

TECHNICAL DATA SHEET

FUR VLF

CHARACTERISTICS

Finishing product for suede leather.

Ready to use mixture of oils with high value for leather with fluorocarbon resins.
Individual reinfattening and waterproofing even outside the dry cleaning machine.
Favours brightness and intensity of colours.
Improves tactile effect and writing.
It gets better waterproofing effect 6-12 hours after treatment.

APPLICATIONS AND DOSAGES

Spray uniformly with the gun 250 ml of VLF FUR on the leather garment, making sure the leather is soaked up in depth.
Applied on the lining it will not cause yielding, providing that the colour is fixed; for that go well guns with the nozzle from 0.8 to 1 mm. The pre-treated garments are pre-dried for 30 minutes, then from damp to wet state they are made rolled for at least 60 minutes in the washing machine for suede with synthetic sponges.
Where it is not possible to treat garments in the tumbler the suede should be brushed well by hand with a brush or with a synthetic sponge.
If it is mixed with Fur Konz, in a solution of 1:1, then mixed with water too in a ratio of 1:5/8, it already soon increases the effect of writing and the tone colour.

CONTENTS/ TECHNICAL DATA

Appearance: liquid
Density: 0.900 approximately
pH value: 7-8

DIRECTIONS

Store protected from frost.
Shake well before use, always close tightly the container after use.
